

***“Nothing’s working! My business is at a standstill.
I’m losing money.
When will we be back up and running?”***
Managed Services

Managed IT service is like having a computer tech look at your computer every day. We manage your computers from our office, so you don’t have to. This reduces security risks as well as potential down time. A lot of times we can either prevent problems all together or keep small problems from become nightmares.

System monitoring. \$9.99 per month per computer

We keep an eye on windows services, your antivirus, backup checks (does not include actual backup service), hard drive check, failed logins, critical events and more.

System Monitoring and preventative maintenance. \$19.99 per month per computer

We do the monitoring as well as apply windows critical updates, cleanup temp files, update other major software.

Managed endpoint protection. \$3.33 per month per computer

We’ll take care of your antivirus and security package. No more renewing and updating antivirus software. We get notified of threats so we can take care of things quicker or before they become a problem.

Web Protection. \$3.33 per month computer per computer

Blocking of known bad websites. Also capable of blocking custom websites and do bandwidth control on a per user basis.

Basic support package. \$5.00 per month per computer.

Includes basic fixes and support via our remote management system. With this system we can also remote in and help you while you are on your computer.

***Remote Management Bundle. \$25.00** per month per computer

All of the above in a bundle. (Your best value, and what we recommend.)

***please note server pricing starts at \$49.99 per month

Peace of mind!
